### MORE CONSIDERATE TOWARD AUSTRIANS

IN AMERICA, THOUGH WAR IS MADE BY WILSON—PERMIT IS NECESSARY IF THEY LEAVE.

But Ban Put on Germans' Moves Doesn't Apply—Majority Loyal To the Adopted Country—Industries Would Be Hurt By Big Withdrawal

Western Newspaper Union News Service.

Washington.—President Wilson, in proclaiming a state of war with Austria-Hungary, specified that subjects of that empire who are in the United States shall receive far different treatment than that specified for subjects of Germany. Austro-Hungarians will suffer few restrictions as a result of the war and will be free to live and travel anywhere in this country. They will not be allowed to leave the United States without permission, and those suspected of being dangerously disloyal may be interned. They need not register with police or postoffice officials, as Germans will be required to do shortly, and are not barred from the 100-yard zones about piers, docks, and warehouses closed to Germans, and are not required to leave the District of Columbia.

The President's motive in drawing distinction between Germans and Austrians was described as twofold.

First, it was realized that the sympathy of Hungarians, Roumanians, Poles, Serbians, Czechs, Slovaks and other immigrants from the Austro-Hungarian Empire generally is not with the mother country in the war, and they have not been guilty of the multi-form campaign of violence practiced under the German war system.

Secondly, such a large proportion of laborers in munition and steel plants and coal mines consists of Austrian subjects that it was found practically impossible to administer against them the rigid regulations imposed on the Germans, who are half as numerous and more individualistic.

#### Destructive Fires In Ohio Coal Mines.

Columbus, O.—Reality of I. W. W. activities were brought home to Ohio in three reports of arson sabotage which came to the State Fire Marshal's office. In all three instances the attack was on coal mines, where suspension of work will be destructive. Two of the fires were at mines near Wellston, Jackson county. The fires burned down entire tipples, suspending work at the mines. A third report, less definite in character as to damage done, came from Leetonia, Mahoning county. The fires near Wellston occurred as the men were leaving the mines.

#### To Protect Sacred Places.

London.—Premier Lloyd George announced in the House of Commons that General Allenby, British commander in Palestine, entered Jerusalem on foot. American and other military attaches entered Jerusalem with General Allenby, the General reported. Guards have been placed around the holy places, the Premier said, and the Mosque of Omar has been placed under Mohammedan control. The Premier said General Allenby's proclamation insured maintenance and protection of all sacred buildings.

### GREATEST HAZARDS OF LABOR

Majority of Accidents Are Among Those Employed in Boiler Shops and in Yard Work.

A statistical report prepared by the department of labor at Washington covering accidents and accident prevention in machine building shows that in classifying the combined plants by departmental divisions boiler shops and yard labor have by far the greatest hazards.

Boiler shops have a frequency rate of 27 days lost per 1,000-day worker, while yard labor has a frequency rate of 221 and a severity rate of 29 days lost. The high rates of the boiler shops are, primarily, the result of insecure trestles and scaffolding. For the excessive rates in the yard department responsibility rests upon the general neglect of safe location and construction of many plants, coupled with lack of safety precautions and instruction.

The report presents a very careful study of the very important subject of accident causes. For the industry as a whole "falling objects" stands out as the most frequent cause of accidents, the frequency rate being 14 cases per 1,000 300-day workers. As measured by severity, "cranes and hoists" assumes first place, the severity rate varying from 1.2 to 2.3 days lost per 300-day worker in different groups of plants.

The report says: "In discussing the question of safety in the machine building industry it is important to remember that that industry not only uses machinery which needs to be safeguarded, but that its work consists of the production of machines for use in other industries. The extent to which the machines thus manufactured will later be a source of danger to the workers in those other industries depends in considerable measure upon the character of their original construction."

### KAISER'S ARMISTICE TERMS

German Proposal Said to Include Evacuation of Petrograd and Disarmament of Fleet.

London, Dec. 13.—It was reported that the terms of the German armistice proposal were that the Russians evacuate Petrograd "until peace came." It was not stated whether the Germans would occupy the capital under such a scheme. Other points on which the Germans insisted were disarmament of the Baltic fleet and the cession of Ukraine to Austria, including the north shores of the Black sea.

### BLAST IS JOLT FOR KAISER

Chemical Plant Loss at Frankfort Compares to Serious Military Defeat for Germany.

London, Dec. 13.—Germany suffered a disaster comparable with a very serious military defeat in the explosion last month which destroyed the Griesheim chemical works near Frankfort-on-the-Main, one of the greatest munition factories in the world, according to a statement issued by the press bureau. It is said to be impossible to reconstruct the works during the war.
